

Basic principles of the Trial Period (1/2)

Goal:

- The Trial Period is focused on the new Implicit and Explicit Market Participants so that they can become familiar:
 - With the new features introduced in the 2nd XBID release applicable for the Market Participants already actively participating in the SIDC (provided that their respective NEMO participates in the Trial Period),
 - With SIDC functionalities and process applicable for the Market Participants who are not using SIDC services yet

Note: The Implicit Market Participants have access to SIDC via the Local Trading Solution which may differ among NEMOs as it may also have additional functions supporting individual processes

Period of execution:

• 1st timeslot: 14/10/2019 - 18/10/2019

2nd timeslot: 21/10/2019 - 25/10/2019

• 3rd timeslot: 28/10/2019 - 01/11/2019

Note: Activation of the timeslot is the full responsibility of the SIDC project. The goal is to execute all related scenarios within the first timeslot.

Basic principles of the Trial Period (2/2)

Operating times:

- The IT System will be operating on a 24x5 basis during the Trial Period.
- The support services (operational and technical consultation, simulation of the predefined scenarios) will be provided between 9am and 5pm CET by NEMOs for Implicit Market Participants and by TSOs (HOPS, ELES, RTE, Amprion) on the respective borders for Explicit Market Participants.
- All requests for support or consultation outside of the supported times are the responsibility of each of the NEMOs.

Technical arrangements:

- Implicit Market Participants are fully the responsibility of each NEMO
- Explicit Market Participants are within the responsibility of the respective TSOs (HOPS, ELES, RTE, Amprion) connectivity data distribution, connectivity tests, manuals for Explicit MPs, ...

Operational Messages:

 The purpose of the Trial Period is to simulate operation as close as possible to the standard production operation. This implies that the system will generate operational messages. The Market Participants shall be advised to distinguish between messages coming from the Trial Period and those coming from routine operations.
